Education

The LNM Institute of Information Technology (LNMIIT) B.Tech in Computer Science Engineering Cumulative GPA: 7.40/10.0	Jaipur, Rajasthan Aug 2024 – May 2028
Dr. Virendra Swarup Education Centre Class XII (ISC) Percentage: 93.75%	Kanpur, Uttar Pradesh 2024
Dr. Virendra Swarup Education Centre Class X (ICSE) Percentage: 95.2%	Kanpur, Uttar Pradesh 2022

Technical Skills

Languages:	Java, C++, JavaScript, TypeScript, SQL, HTML/CSS
Frameworks:	React, Node.js, Express.js, FastAPI, Tailwind CSS, Turbo, Vite
Databases:	PostgreSQL, MongoDB, Supabase
DevOps/Tools:	Git, GitHub, Bash, Vivado, OMNeT++
Technologies:	REST APIs, Progressive Web Apps (PWA), Data Pipelines
Core CS:	DSA, Operating Systems, DBMS, Computer Networks, OOP

Work Experience

Practers <i>Software Development & SEO Intern</i>	Remote March 2026 – Present
- Developed responsive frontend features using React, improving application usability, responsiveness, and overall user experience. - Implemented AI-powered interview functionalities by integrating Speech-to-Text (STT) and Text-to-Speech (TTS), enabling seamless voice-based mock interview sessions. - Built and managed interview question modules, supporting structured question flows and customizable interview experiences across multiple domains. - Integrated PostgreSQL-backed APIs and utilized Supabase for authentication, database operations, and efficient retrieval of interview-related data. - Collaborated on technical SEO improvements by optimizing metadata, fixing on-page issues, and enhancing content discoverability.	

Projects

Guest House Management System - MERN Stack	GitHub
- Developed a full-stack Guest House Management System using the MERN stack to streamline guest registration, room booking, reservations, and check-in/check-out operations. - Designed and implemented RESTful APIs for user authentication, room management, and booking workflows, enabling seamless communication between the frontend and backend. - Built a responsive React-based user interface with secure authentication, CRUD operations, and efficient MongoDB database integration, improving administrative efficiency and user experience.	

Blog Publishing Platform

- Developed a full-stack blogging platform using the MERN stack featuring a rich text editor with support for headings, images, tables, and formatted content.
- Implemented complete blog management workflows including draft creation, publishing, republishing, editing, and deletion through RESTful APIs and MongoDB integration.
- Built a responsive React frontend with dynamic content rendering, media handling, and an intuitive writing interface to provide a seamless content creation experience.

Achievements

- Solved 100+ Data Structures & Algorithms problems on LeetCode, strengthening problem-solving and algorithmic skills.
- Achieved an SGPA of **8.93/10** in the first semester, earning an academic branch upgrade from Mechanical Engineering to Computer Science Engineering.
- Led the college badminton team to a **1st-place finish** at the annual institute sports fest, demonstrating leadership and teamwork.
